SKILLS

Software Development

- *Programming Languages:* Java, JavaScript, TypeScript, Python, .Net
- *Programming Techniques:* OO, MVC
- *Emphasis on Clean Code:* Easy To Change, Don't Repeat Yourself

Technologies

- *Database Interaction:* MySQL, PostgreSQL, SQLite, FireStore
- *Java Frameworks:* Spring Boot, Spring Security, Hibernate
- *JavaScript Frameworks:* TypeORM, NestJS, NextJS, VueJS
- *Containerization:* Docker

Additional Skills

- *Problem-Solving:* Independently solve challenges by finding solutions, taking initiative, and double-checking or rethinking when needed.
- *Languages:*
 - Dutch - Native language
 - English

EXPERIENCE

Internship

Wisemen, Full-stack developer

Feb 2024 - Jun 2024

During my internship, I developed a Proof of Concept (POC) for a chat application. This application allows users to chat based on a vehicle's license plate, making it easy to get in touch with the driver. It includes features such as license plate-based chat, groupschat, notifications, user management, and file sharing. Throughout this project, I gained hands-on experience with technologies like Vue.js, Node.js, NestJS, TypeScript, and PostgreSQL. Additionally, I learned how to write clean code and discovered better practices for structuring and organizing code efficiently.

Holiday Job

BeLogic, Industrial Automation

2018 – 2024

In addition to programming HMI screens, drawing electrical diagrams, and assembling, I also have experience in PLC (Programmable Logic Controller) programming. This involves writing code and configuring PLCs to control and automate industrial processes. Through this experience, I have developed a strong understanding of Siemens PLC programming languages.

EDUCATION

Thomas More University of Applied Sciences

*Bachelor Applied Computer-Science -
Digital-Innovation*

2021 – 2024

Degree finished with Cum Laude.

PROJECTS

Portfolio

siebecamerman.be

On my portfolio website, I showcased various projects that I have worked on. These projects highlight my skills and expertise in areas such as application development, web development and a bit of IoT. Feel free to explore my portfolio to get a closer look at the projects I have completed.
